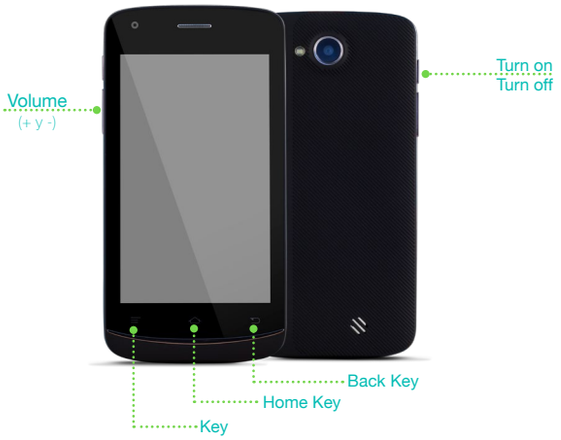
FUNCTION BUTTONS

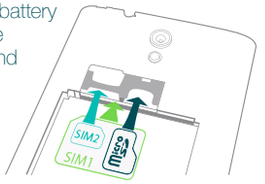
This device utilizes five function buttons:

- Turn on/Turn off button, and volume key on its sides.
- Settings key/ home key/ back key in the lower front part.



DUAL SIM

This device has dual SIM that will allow you to have two different lines in one phone. Before the device is turned on, insert one or two SIM cards and the Mini SD Card. To insert the cards remove the back cover and the battery and insert the cards as indicated in the image over the slots. Put the battery and the cover back in its place.



TURNING ON/OFF THE PHONE

Press the power key during a few seconds until the phone turns on. Follow the steps in the screen to configure it and to start the functioning of the phone and the SIM cards previously inserted. To turn off the device press the power key until the options menu opens and select “Power off”.

•

NETWORK CONNECTION

As long as one of the SIM cards is connected, your Smartphone will switch automatically to a network that is available. If an emergency message appears, that means your card is either not valid or it’s out of broadband coverage.

•

WIFI CONNECTION

You can access the internet wirelessly from your phone using WIFI technology. In order to do this, go to applications- settings- wireless connections and select Activate WIFI. There is a list with the networks available, select one, if you are trying to connect to a safe network you will be asked to enter a password, then the connection will be establish and you will be able to navigate.

•

CALLING

Press the call icon, tap the number or select it from your contact list. Tap the call icon again and make your call. When you are finish, press the phone icon to end the call.

APPS

Press the apps icon and you will be able to access all the applications and widgets available in your device.

•

Press the Settings icon to configure all the settings in the device.

•

CHARGING THE BATTERY

Connect the phone charger cable to a power source and insert the USB in the device slot.

•

HEADPHONES

Connect the Jack 3,5 in the phone headset connector; this way, you can only hear the sound through the headphones.

•

CABLE USB – OTG

Use this cable to connect the device to your computer.

SAR

Distance of operation: This phone model has been tested and meets radio frequency exposure guidelines when used as follows:

- Against the Ear: Place or receive a phone call and hold the phone as you would a land line telephone.
- Body worn: When transmitting, place the phone in a carrying accessory that contains no metal and positions the phone a minimum of 2.5 cm from your body. Use of other accessories may not ensure compliance with radio frequency exposure guidelines. If you do not use a body worn accessory and are not holding the phone at the ear, position the phone a minimum of 2.5 cm from your body.
- Data Operation: When using a data feature, position the phone a minimum of 2.5 cm from your body for the whole duration of the data transmission.

•

CONFORMITY CE

This device complies with the provisions of the 1999/5 / EC 2004/108 / EC and 95/2006 / EC following its harmonized standards, for more information please see our website.
